# Company Profile

Seller Machinery Import&Export company offers the best deals in Turkey.

Seller Machinery Import & Export collaborates with almost all the metal working manufacturers in Turkey and supplies the World class Turkish metal working machines to the Middle East, CIS nations, North African and Europe.

We offer to our customers the best quality, competitive price and after-sale technical service to the industry that we are aiming to be the leading companies. We not only supply equipment, but also help the client by managing the entire sourcing process in Turkey such as finding manufacturers of metal working machines, technical support , negotiating price , quality control , managing logistic and so on. As part of our quality control services, we also provide miscellaneous services and manage and plan our client's visit to our company and manufacturer factory visits and providing translators. This ensures that the clients can maximize the results of their visit.

We have big experience in metal working machines in Turkish market and we are able to make quotation and make delivery of goods in a short period of time and under the most favorable conditions.

Our services include:

- Supplying metal working machines
- Factory visit / quality audits
- Contract administration
- Organizing of Logistics and Shipping
- Technic service

- Configured from 3 Axes (Y1, Y2, X) to 8 Axes (Y1, Y2, X1, X2, R1, R2, Z1, Z2)
- Parallelism of top beam is achieved by proportional valve system
- High quality linear scales
- Hydraulic, CNC motorized and manual crowning system options

- Front sliding support system with flip stop
- Adjustable working speed
- Automatic tonnage adjustment depending on thickness of material and V die
- Automatic, semi-automatic and manual working modes.
- Automatic axis referencing

- Programmable bending and backgauge speeds
- Honed and chrome plated cylinders
- Adjustable backgauge finger blocks
- Automatic stroke adjustment according to bending angles
- Rexroth hydraulic system

### AN EXPERT AT YOUR SIDE EXPERT

software offers 2D programming that includes automatic bend sequence calculation, collision detection and also 3D visualization, in production, for programs created by offline software. EXPERT solutions is available on 10.1" and 15" resistive touch panels.

### EXPERT FEATURES

- Quick Editor function to create quickly 2D parts
- Automatic search of the best bend sequence
- 3D visualization in production
- Tool navigator for a quick tooling up

### STEP AUTOMATION SA10+

### THE BEAUTY OF TECHNOLOGY

IDEA offers many advanced features so it's able to meet all the demands of bending. The graphical user interface is simple and friendly, with a large display that allows a touch screen navigation intuitive and easy. IDEA solutions is available on 17" and 19" resistive touch panels.

### IDEA FEATURES

- Tools and parts import from CAD
- Quick Editor function to create quickly 2D and 3D parts
- 3D Simulation with automatic identification of best sequence of bend with collision detection
- Automatic tool selection and machine tooling
- Sampling of the material for accurate production

### STEP AUTOMATION SA17+

**ModEva Pac** is a natural evolution of Cybelec's famous numerical controls. Its large 15" Touch Screen combined with the latest evolution of the ModEva user interface empowers the operator to interact in a quick, convenient and more efficient manner with his machine, ultimately increasing his productivity.

Integrated in a sleek design housing featuring a simplified keyboard with large keys, this compact numerical control unit is available in 2 versions: 4 or 7 axes. It can optionally also be delivered as a robust panel.

Depending on the software installed, ModEva Pac will drive standard synchronized press brakes or more sophisticated ones with for instance bending aids.

### CYBELEC MODEVA PAC

**CybTouch 12 PS** is specifically developed for synchronized press-brakes.

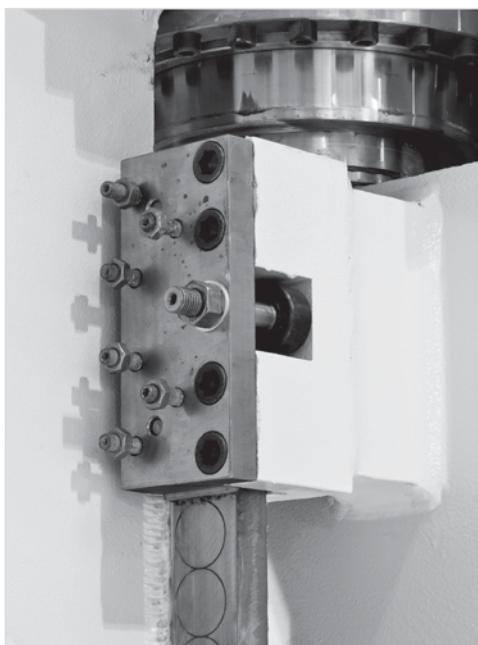

As part of the CybTouch range, it has an intuitive and vivid color touch screen and a high integration of functions.

With its interactive touch software interface with large keys, its 2 D graphic display, on-line help, and many other automatic functions that constantly guide the operator,

CybTouch 12 is very easy to operate.

CybTouch 12 comes with a robust, modern and streamlined housing specially designed to be mounted on an arm.

### CYBELEC CYBTOUCH 12

## HYDRAULIC PRESSES

Seller SHGS variable rake angle hydraulic guillotine shear has strong structure and easy usage. Automatic blade gap, rake angle and backgauge position adjustment are done by CNC controller according to thickness of material and any type of sheet material can be cut with best quality.

- Real innovation.
- High quality, high performance.
- User friendly control unit.
- Monoblock, steel welded construction.
- High precious cuttings

► CybTouch 6 Control Panel

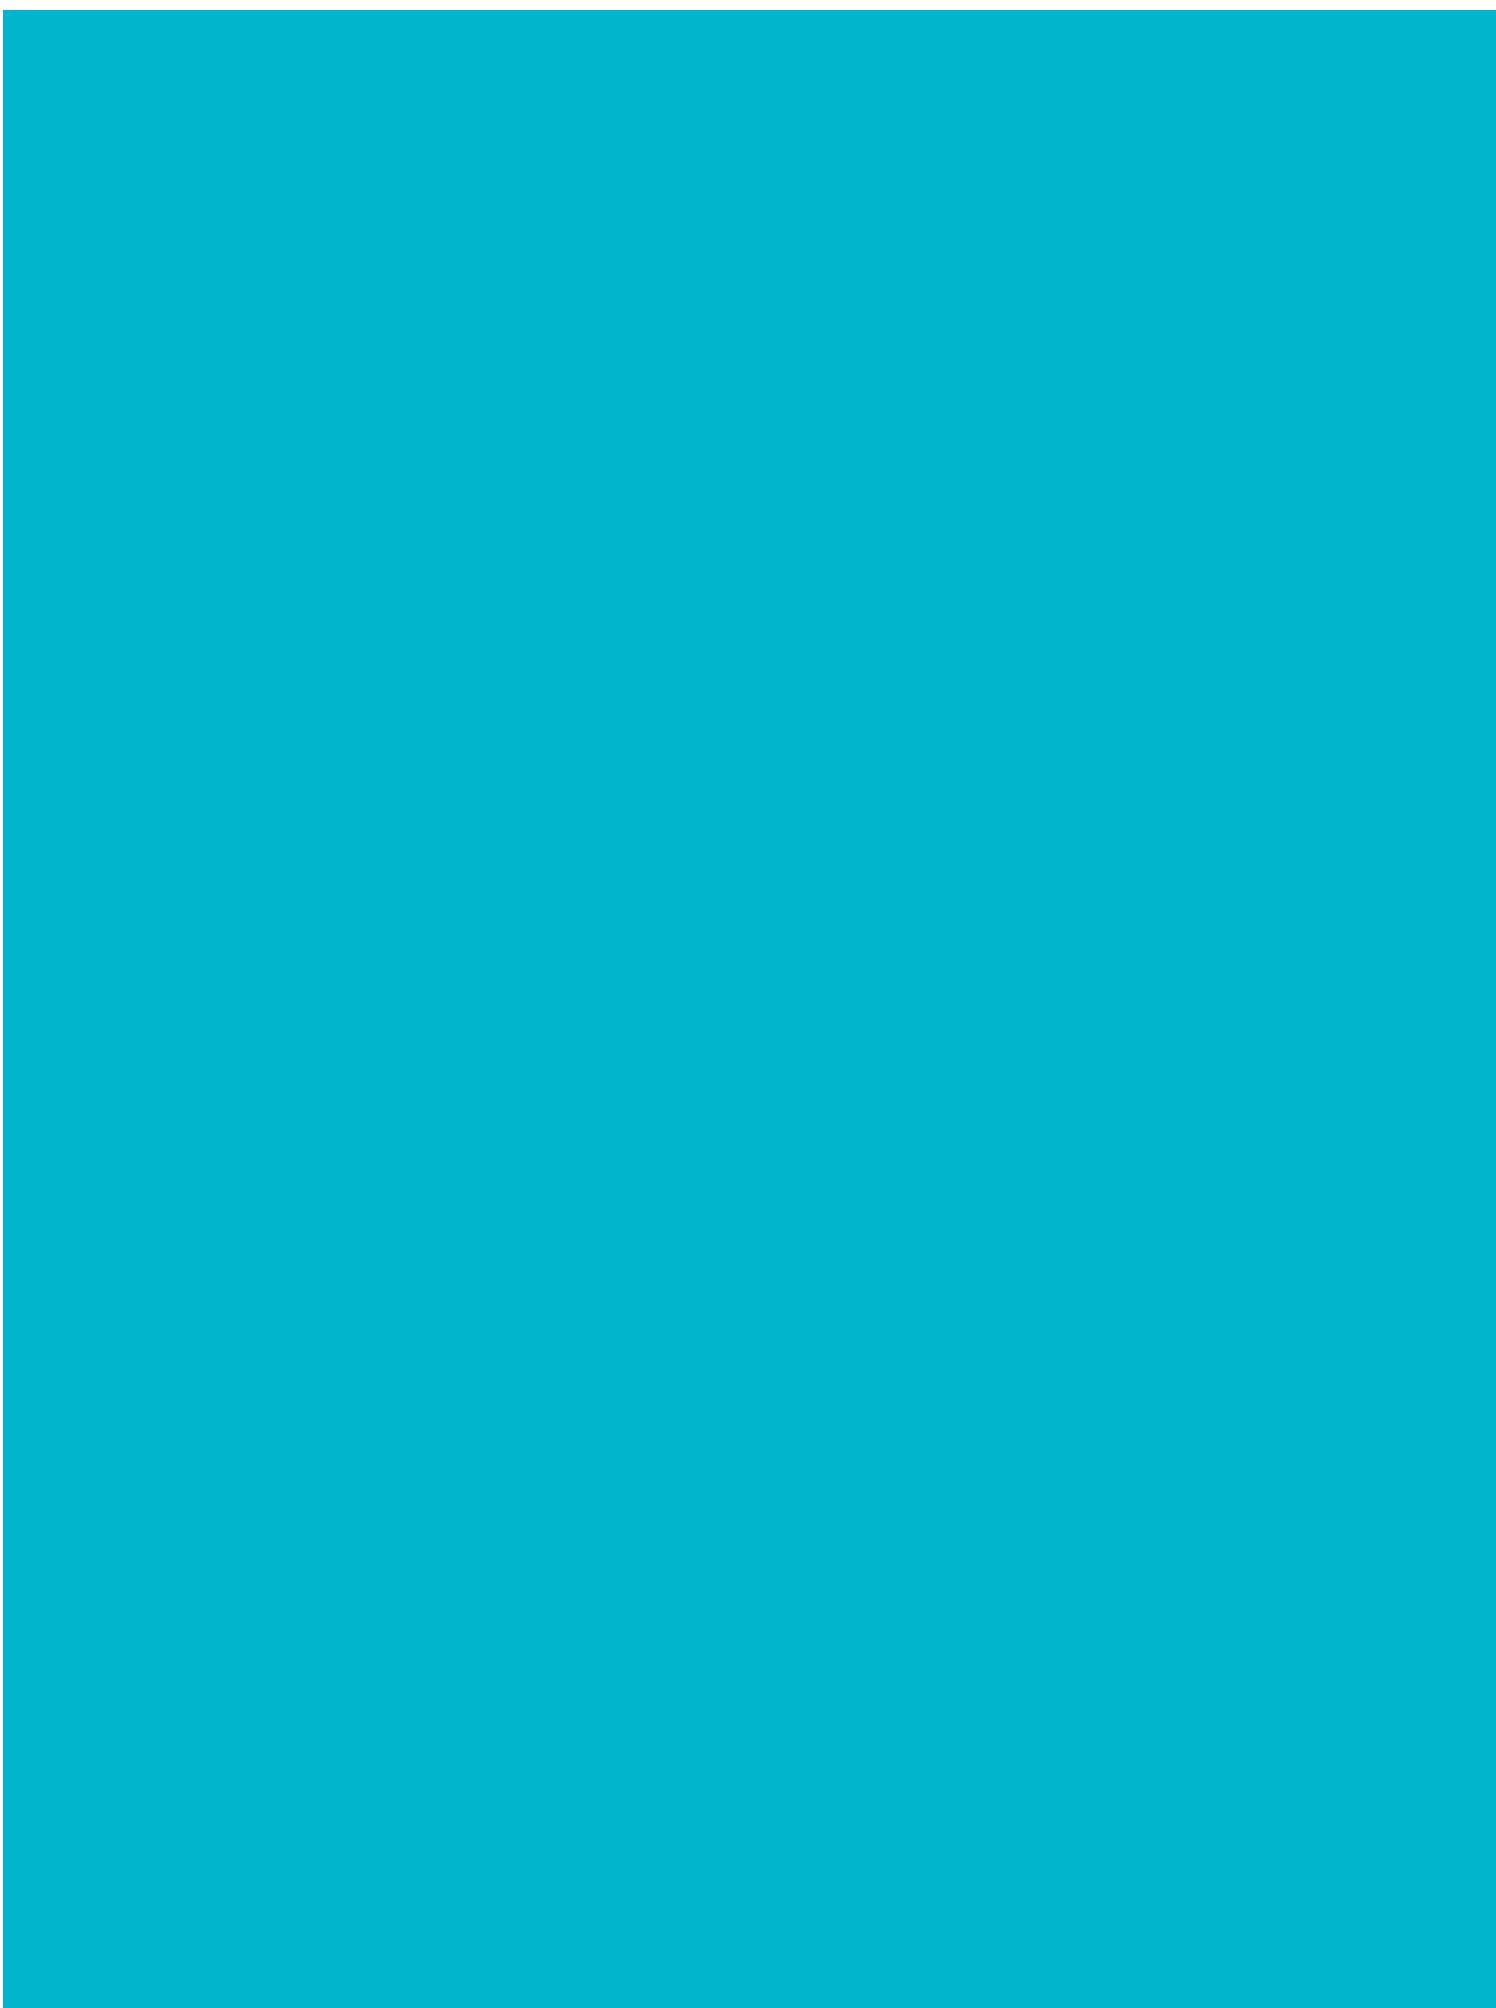

## Standard Equipments

- High quality and hardened blades with 4 cutting edges
- Cybelec Cybtouch-6 touch screen CNC Controller
- CNC controlled blade gap, rake angle adjustment
- CNC Controlled motorized backgauge
- 1 meter squaring arm with inch and metric ruler
- 1 meter Front support arms
- Cutting line illumination
- Emergency Stops
- Front table with rolls
- Back sliding sheets

## Optional Equipments

- Pneumatic sheet support system for thin materials
- Angular gauge • Longer front support arms • Laser cutting line
- Anti-twist system • Light guard for finger protection
- Front sheet feeding system • Conveyor • Stacking system
- Blades for stainless steel cutting • Oil cooler
- X1, X2 adjustable angle backgauge system

## CNC PLASMA CUTTING MACHINES

- Hypertherm/Kjellberg high precision plasma power supply
- Windows based CNC control unit
- Automatic nesting software
- Automatic torch clearance control system
- 3D collision protection system
- Automatic exhaust suction system for plasma cutting
- Cutting table with higher burden capacity for oxy cutting
- Accurate servo controlled motors on the "Y" and "X" axis
- Durable elevator rails on the "Y" axis
- Suitable bridge for multiple oxy torch applications
- CNC unit can be mounted on the bridge on request.
- Alternative Hypertherm plasma sources 130A, 260A, 400A

## HAND-LEVER GUILLOTINE SHEARS (CAST-IRON)

- Cast iron table and frame
- Large table facilitating the command of sheet metal by operator
- Mechanical sheet clamping system
- Cutting lever made of low carbon steel for the purpose of

- flexibility and stability
- Manual back gauge suitable for cutting narrow and thin sheets
- Front set-square appropriate for angle sheet metal cutting and millimeter set-square appropriate for vertical cutting

- Rigid cast frame
- Special steel blades
- Shafts assembled in bronze bushings
- Gearbox motor with brake system (SDMK-2, SDMK-1.8)
- Mobile control panel with foot pedal (SDMK-2, SDMK-1.8)
- Central lubrication system (SDMK-2)
- Inside diameter cutting system (SDMK-2)

#### OPTIONAL EQUIPMENTS

- Pneumatic sheet centering device

Note: SDMK 1.8 can not inside diameters.

- The SHNM- 6 hydraulic notcher can cut up to 6 mm
- The biggest notcher size is 250x250 mm
- The notching angle fixes in 90° with high notching speed
- The hydraulic notcher has compact structure, small volume and convenient operation
- SHNM-9 variable rake hydraulic corner notchers have a strong frame with its statically and dynamically rigid steel table and top beam material.

- T slot top table realizes precise cuttings and there is no need for alignment for different sheet thicknesses by means of automatic blade gap adjustment.
- SHNM-9 series perform frequent cutting repeatability via 4 hydraulic hold-down cylinders.

### OPTIONAL EQUIPMENTS

- Automatic Feeding system

**SHNM-6**

**SHNM-9**

- Ideal for Steel plate , rod steel and flat bar cutting

- Hight tensile durable blades

- Easy to carry and mount on a table or stand

- Easy blade exchangable

### OPTIONAL EQUIPMENTS

- Stand

# SCM-D

## SHEET METAL FOLDING MACHINES

- High working capacity
- Special design easy working to supply cast iron construction
- Counter-balance systematic reduces the sheet metal bending force
- Product steel knives

- Easily adjustable angle systems

### OPTIONAL EQUIPMENTS

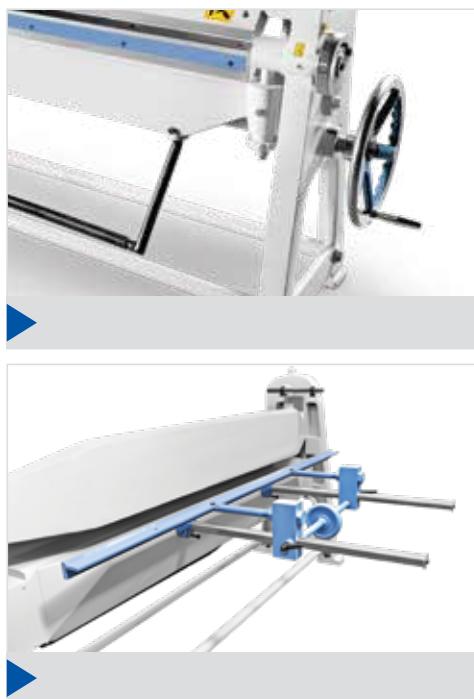

- Motorised top beam with foot pedal controlled
- Manual & NC controlled 750/1000 mm back gauge

Seller reserves the right to make changes in models of products in the catalog and their technical features anytime without notice.

- Steel constructed, portable frame for easy transport

- Ideal to work with Aluminium copper and steel material

- The slitting attachment enables for cutting easily and detachable if needed

- Easy use top beam press & release system

### OPTIONAL EQUIPMENTS

- Slitting attachment

# SCM-PA

## MANUAL FOLDING MACHINES - HVAC TYPE

- Welded steel construction
- Easy handling of material by hands with assist of foot pedal locker

- Welded steel construction
- Lower and upper blades open up to 100mm
- Ideal easy use for industrial and special design purposes
- Easy handling of material by hands with assist of foot pedal operation

# SCM-S

## 3 IN 1 COMBINATION MACHINES

- 3in1 All functions together, our special model offers practical and quick solutions for small workshops.
- Produced with high quality long lasting cast steel
- Plate rolling, sheet folding and shearing on the same machine, easy and handy for all sizes of thinsmith shops and repairshops.

SCM-S 1050

SCM-S 310

SCM-S 1320

- One arm to make all operations easily
- Backgauge for shearing function

# 4R SHS

## HYDRAULIC 4 ROLLS PLATE BENDING MACHINES

- Very suitable for light and medium plates, aluminum or stainless steel
- Ferrules in full circle or varying radiiuses can be done easily
- Pinch Roll and lateral rolls move with pyramid linear direct movement by hydraulic pistons
- Overload protection

- Top roll is powered by electrical motor and planetary gearbox. bottom roll powered with cardan joint system
- Three digital readouts for easy roll positioning
- Hydraulic Drop-End for easy removal of finished ferrule
- Easy operation with mobile control panel
- Welded steel frames

4R SHS 3050 x 250

4R SHS 2550 x 250

**4R SHS 2060 x 250**

## STANDARD EQUIPMENTS

- Induction hardened forged or rolled SAE 1050
- (CK 45) Steel Rolls
- Conical Bending device
- Hydraulic balancing system

## OPTIONAL EQUIPMENTS

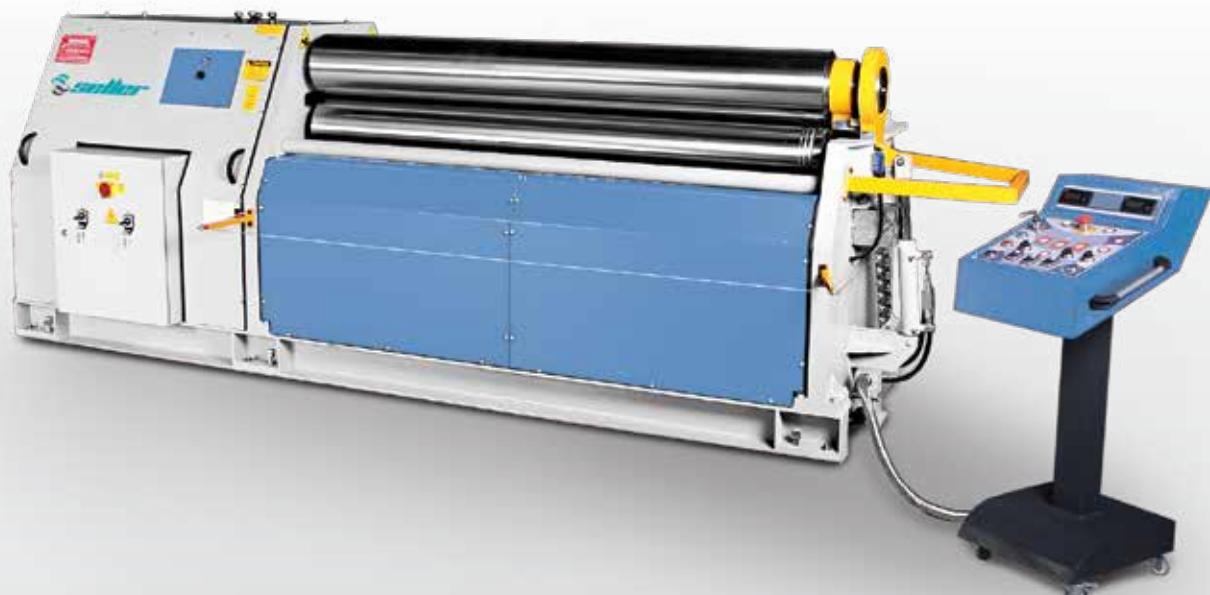

- NC Control
- Overhead crane for large diameters
- Hydraulic lateral side supports for large diameters
- Ground and polished rolls
- Double speed system
- Infinitively variable speed
- Hydromotor for rotation
- Ejector system

# SMRM-H

## HYDRAULIC ASSYMETRICAL INITIAL PINCH 3 ROLLS PLATE BENDING MACHINES

This hydraulic model is designed for light to medium jobs. It is used in jobs up to 10 mm thickness materials. It is used in aluminium bendings, air conditioning channels, advertising panels and machinery sheet metal covers.  
• Welded steel main frames

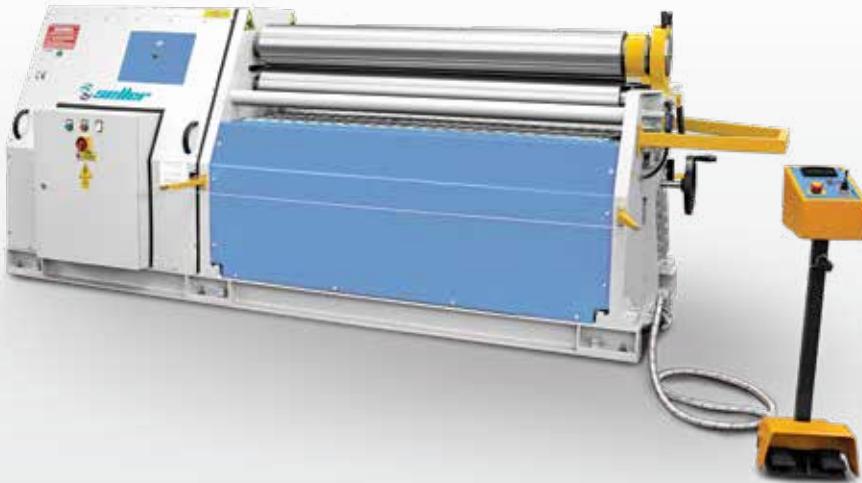

- Hydraulic Drop-End
- Motor powered centralised rolls
- Hydraulic movement of back roll and bottom roll
- Main motor with brake system
- Conical bending, prebending available
- Planetary gearbox two rolls driven

SMRM-H 3050 x 250

SMRM-H 2050 x 180

**SMRM-H 1550 x 160**

## STANDARD EQUIPMENTS

- Back roll with ball bearings for thin sheet works
- SAE 1050 (CK45) certificated forged steel rolls with high tensile strength
- Hardened rolls
- 2 Pcs. digital read-outs
- Mobile control panel

## OPTIONAL EQUIPMENTS

- Overhead crane for large diameters
- Hydraulic lateral side supports for large diameters
- Ground and polished rolls
- Wire grooves on roll ends
- NC control
- Double speed working
- Adjustable stepless speed
- Hydromotor option

# 4R SHS

Plate bending capacities are given for 24 kg/mm<sup>2</sup> plate yielding strength.

# SMRM-S

## MECHANICAL ASSYMETRICAL 3 ROLLS INITIAL PINCH PLATE BENDING MACHINES

- This mechanical model is designed for light to medium jobs. It is used in jobs up to 10 mm thickness materials. It is used in aluminium bendings, air conditioning channels, advertising panels and sheet metal covers.
- Welded steel main frames

- Two rolls powered by a single chain and belt driven helical type gearbox and gear system
- SAE 1050 (CK 45) quality certificated steel rolls with high tensile strength
- Mechanical manual openable Drop-End

## STANDART EQUIPMENTS

- Mobile Control Panel
- Conical Bending Device
- Central lubrication system
- Top roll support system
- Precision Bending with Brake Motor
- Motorised Adjustment of Back Roll

## OPTIONAL EQUIPMENTS

- Digital read-out for rear (back) roll
- Induction hardened rolls
- Extended roll shafts for profile and pipe bending operation
- Profile and section bending rolls set
- Motorised bottom roll
- Plastic coated top roll for alucobond bending
- Variable stepless speed
- NC Control

- Two rolls powered by a single gearbox and gear system for top and bottom rolls.
- SAE 1050 quality certificated steel rolls with high tensile strength.
- Spheroid cast iron main frames.
- Mobile control panel by foot pedal. • Conical bending device.
- Manual Drop-End. • Top roll support system.
- Wire grooves at the end of the rolls (4/7/9/13)

### OPTIONAL EQUIPMENTS

- Motorised back roll adjustment (Model SIRM 2550x140 produced standard with motorised back roll.)
- Precision bending with brake motor
- Digital readout for motorised rear roll
- Induction hardened rolls

- Cast iron main frames
- Main motor with reducer (SMSM types)
- Swing out openable top roll (drop end)
- Conical bending, pre-bending available
- Wire bending grooves
- Mobile control panel (SMSM types)
- SAE 1050 quality certificated steel rolls with high tensile strength

## OPTIONAL EQUIPMENTS

- Induction hardened rolls

# SRM / SRS

## 3 ROLLS MOTORISED and MANUEL PLATE BENDING MACHINES

- Top and bottom rolls powered by a single gearbox and gear system (SRM)
- SAE 1050 quality certificated steel rolls with high tensile strength
- Cast iron main frames
- Mobile control panel by foot pedal on rm models
- Conical bending device • Manual Drop-End
- Wire grooves at the end of the rolls

### OPTIONAL EQUIPMENTS

- Motorised back roll adjustment
- Digital readout for motorised rear roll
- Induction hardened rolls
- Precision bending with brake motor on SRM models
- Full closed sheet covers

- Welded steel construction frame
- Forward-backward adjustable bottom shaft
- Forward-backward adjustable sheet support
- Steel shafts assembled with bronze bushings
- Gearbox motor with brake system
- Control with foot pedal
- Complete with bottom stand
- 4 Set of rolls standard

### OPTIONAL EQUIPMENTS

- Movement of top roll by hydraulic system
- Optional rolls for special jobs

# SLS

## LOCK SEAMER MACHINES

- Gearbox driven pinching system
- Easy operation by pneumatic pressing piston
- Pinching and rotation is controlled by a standard foot pedal

- Pneumatic system is protected by the help of air filter
- Hardened seaming rolls
- Sliding system with ball bearing

- Steel shafts assembled with bronze bushings
- Gearbox motor with brake system
- Control with foot pedal
- Complete with bottom stand
- 4 Set of rolls standard

### OPTIONAL EQUIPMENTS

- Movement of top roll by hydraulic system
- Optional rolls for special jobs

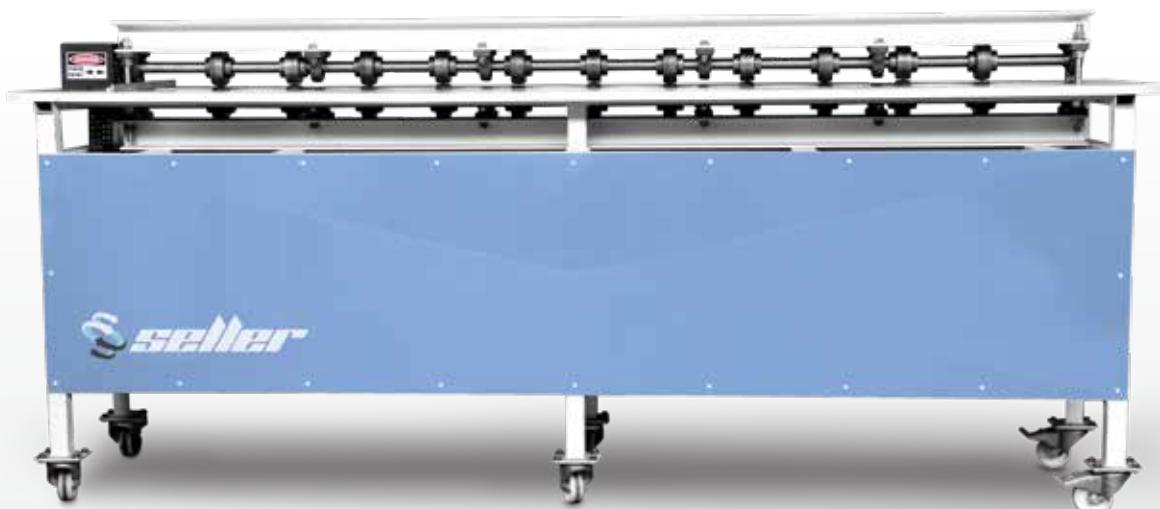

# SIM

## TRACE PRESSING MACHINES

- Motor with gearbox
- Chain driven system
- Welded steel construction
- Portable easy to carry in workshops
- Machine thickness adjustment is made easily by the bolts according to the sheet thickness

- Top and bottom rolls distances can be adjusted according to the thickness
- Rolls are manufactured by hardened steel
- User friendly machine that HVAC manufacturers can use efficiently for long years.

- Punch and die Ø 22\* - Ø 26\*\*
- (\*SHPM 65/ 85 - \*\*SHPM 115 / 175)

- Punch holder
- Working Light
- C-Spanner

### OPTIONAL EQUIPMENTS

- Punching

With the punching tool, holes and punches up to Ø 57 mm (in 10 - 16 mm thickness) can be punch easily and efficiently. The punches and dies are interchangeable and easy to change. Special tools and punches are available upon request.

# SHKM40

## HYDRAULIC STEELWORKERS

- Central lubrication system
- Four individual workstation on the machine:
- » Ø22 mm punch and die and standard punching tools
- » Steel solid round and square bar cutting blade set
- » Angle cutting blade set
- » Sheet metal cutting shear
- Single piston, 4 work stations. Without notching station.

**SHKM 40**

## 3 ROLLS MACHANICAL ALUMINIUM PIPE BENDING MACHINES

- Steel frame , 2 bottom rolls chain gear powered
- Direct drive power system with gears
- Top roll is idle (free rotation)
- Plastic pipe bending roll set has 2 sizes for 50 mm and 19 mm pipes, included as standard on the machine

- Rolls shafts are special steel material hardened and ground
- Manual adjustable guide rolls
- Horizontal and vertical working position

- Welded steel construction
- Two bottom rolls powered
- Direct drive power system with gears
- Top roll is idle (free turning)
- Rolls are hardened
- Rolls shafts are special steel material hardened and ground
- Single speed motor
- Standard rolls
- Adjustable guide rolls
- Horizontal and vertical working position
- 2 driving rolls
- Pyramid style design
- Bending capacity: pipe up to 1"; angle up to 20 x 20 mm
- Manual hand lever adjustment of top bending roll
- Combination horizontal-vertical working position

## OPTIONAL EQUIPMENTS

- Stand
- Double speed motor
- Pipe/Tube bending rolls
- Profile bending rolls
- Angle bending rolls
- Digital readout
- Special lateral angle guide rolls

# SHPK

## HYDRAULIC SECTION and PIPE BENDING MACHINES

- Welded steel construction
- 3 Rolls are motor driven
- Hardened shafts from special steel material
- Top roll hydraulic moveable up-down
- Horizontal and vertical working position

- Standard rolls
- Guide rolls
- Brake motor equipped for the precision bending
- Mobile control panel

Bending capacities are given for 24 kg/mm<sup>2</sup> plate yielding strength.

Seller reserves the right to make changes in models of products in the catalog and their technical features anytime without notice.

- Welded steel construction
- 3 Rolls are powered
- 3 Rolls are hydraulic powered by planetary gearbox (SHPK100)
- Hardened and ground shafts made of high tensile special steel
- Horizontal and vertical working position
- Hardened standard rolls
- Mobile control panel
- 3 Axis mechanical by hand lateral angle guide rolls
- Brake motor equipped for the precision bending
- Digital Read-Outs (2 pcs)

## OPTIONAL EQUIPMENTS

- Pipe / Tube bending rolls
- Profile bending rolls
- Angle bending rolls
- Digital Read-Out
- Optional lateral angle guides
- Optional stairway bending attachment
- NC control
- Hydraulic lateral guide rolls (2 axis)
- 3-Axis hydraulic lateral guide rollers (SHPK100)

# 3R SHPK

## HYDRAULIC SECTION and PIPE BENDING MACHINES

- 2-3 Driving rolls
- Pyramid style design

- Hydraulic adjustment of top bending roll
- Combination horizontal-vertical working position

## HYDRAULIC PRESSES

# S-ODPC 77/850

HYDRAULIC DEEP DRAWING PRESS with DOUBLE EFFECT FOR SPECIFIC PURPOSE

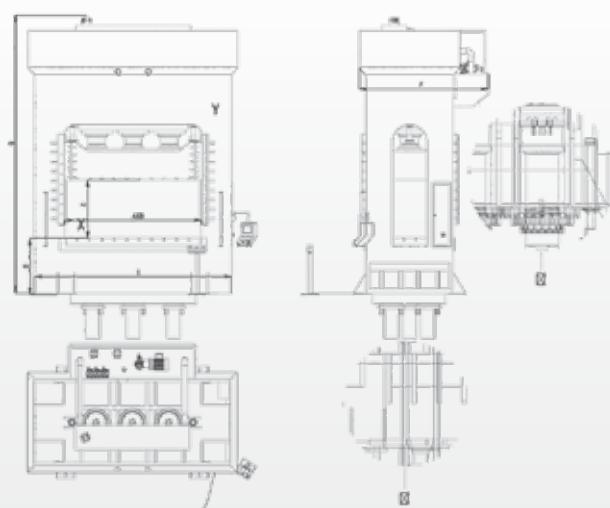

Deep Drawing Presses are the main machines used in fields like Automotive, White Appliances and Natural Gas. These type of presses are generally known as "Double Effect Presses" because they apply the pressure from the up and work with the

cushion cylinders from the down.

This process is made by giving shape to sheet metal materials in various thickness and different characteristics (steel,stainless steel,alloy sheet etc.) with high pressure

between a male and female mould.

S-ODCP Series we can manufacture 1300\*1600 mm table sizes up to 1600\*1300 mm between 300-4000 tons pressing force.

## HYDRAULIC SPECIAL C TYPE PRESS

**S-HCP 77/540**

'C' type presses are preferred in low tonnage needed processes for the formed workpiece to leave the mould easily.

It can be done cutting, punching, forming, pounding and drawing in small sizes with these type of presses.

S-HCP Series, we can manufacture 300\*400 mm table sizes up to 800\*600 mm between 30-250 tons pressing force.
